Raptor XCHANGE

WHITEPAPER

RaptorXCHANGE
TOKEN (RXT)

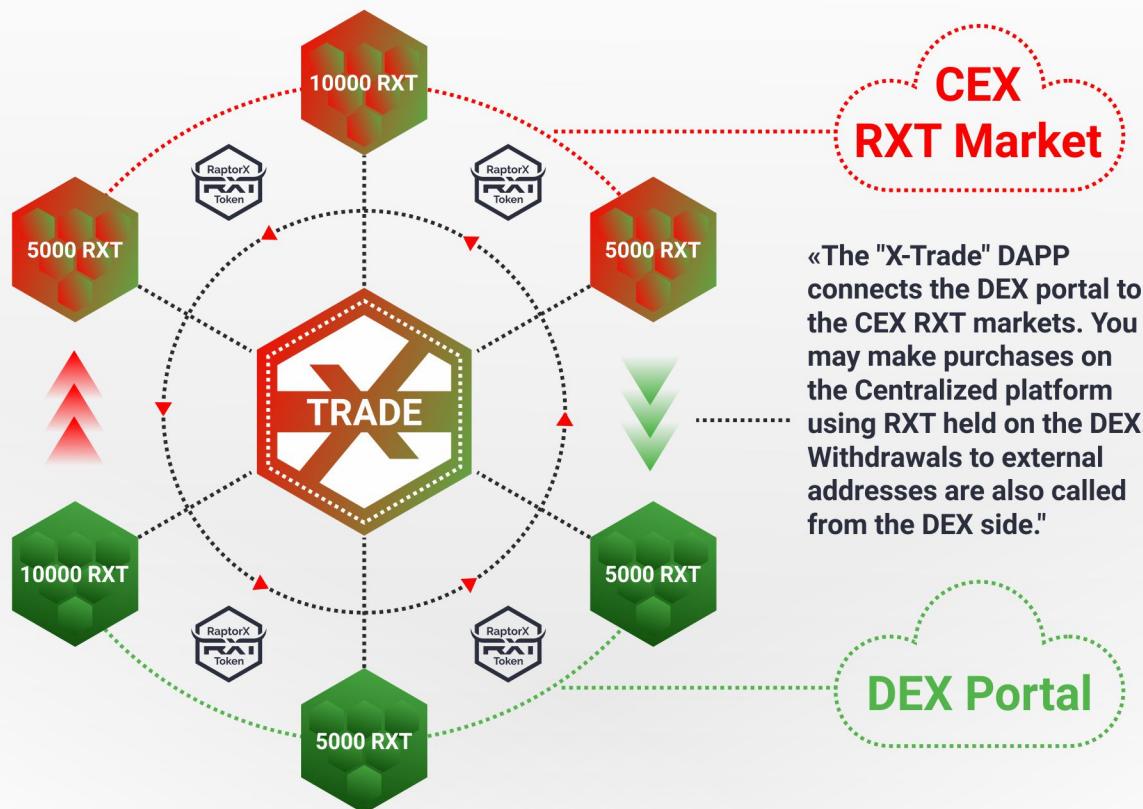

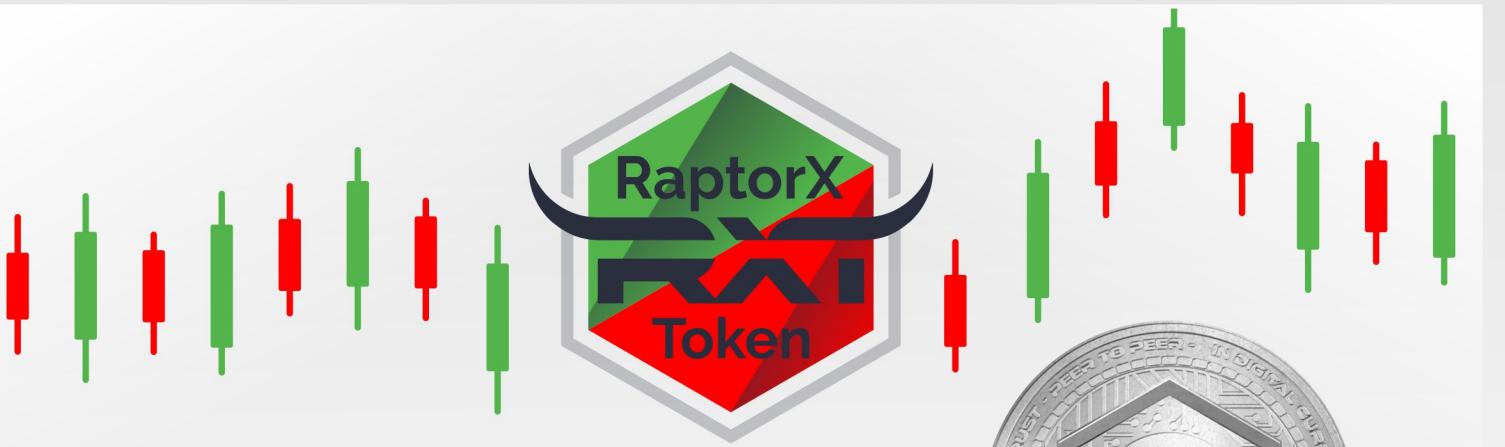

Introduction

RaptorXchange was developed to provide a safe and secure trading ecosystem for investors as well as developers. We offer complete ease of use, customizable trading environments, social networking, and a top of the line security.

Technology

A Centralized trading platform as well as a Decentralized trading platform will run parallel. Featuring an industry first crossover functionality “X-Trade”, Users of the Decentralized portal may connect and place orders on the Standard Exchange through the RXT market. By providing a gateway for order processing, a user may safely and anonymously trade any currency listed on the RXT marketplace.

RXT Distribution

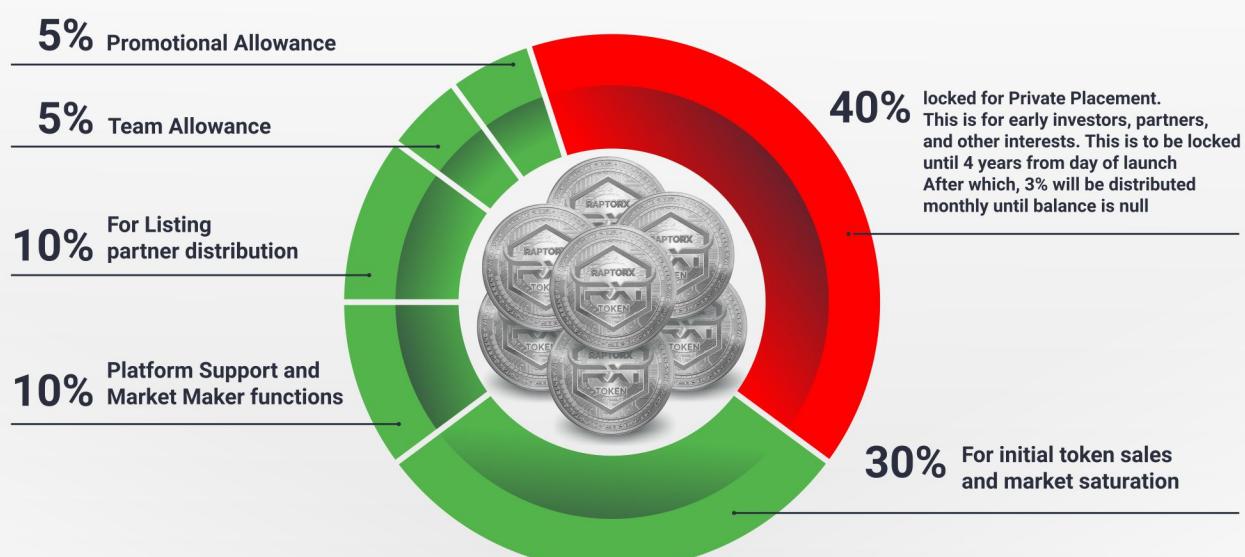

RaptorXchange Token known as RXT will serve many functions on and off the exchange. RXT is an ERC20 token issued on the Ethereum platform and supports all Ethereum wallets.

Token: RaptorX (RXT)

Supply: 100 000 000 RXT

Contract Address: 0x4bffd10cf632e6c37214d19fec8c343ed0a7bdc5

Security

RaptorXchange breaks industry standards with top level security and encryption practices. 2FA optional for all transactions and member data access, Hardware wallet support for Trezer & Ledger, and 95% Cold Wallet storage guidelines.

A.I. Program

RaptorXchange will feature a Deep Learning A.I. Pilot program. Our exchange will be the first in this program and is to be monitored for market movement data. Combined with many other inputs of information, RaptorXchange will help develop a form of next generation market prediction algorithms. Monitoring will take place on the Centralized platform and will gather broad data as opposed to individual trades. We do not access any of our members accounts and can not see any personalized information.

Support

24/7 Support chat will always be available on RaptorXchange. Any inquiries can also be made on our main email at business@raptorxchange.com

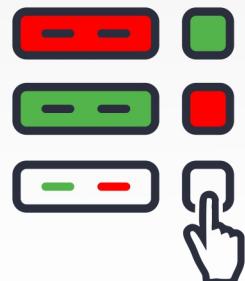

RXT Overages

Holders of RXT may receive overages pay from the Pilot Program. These are distributed amongst all holders and based on the amount of RXT held during the previous monitoring period.

Voting

Investors who hold at least 1 Million RXT will now be able to take place in voting events. These include but are not limited to; new listings, marketing, campaigns, and new business directives.

RXT Gear

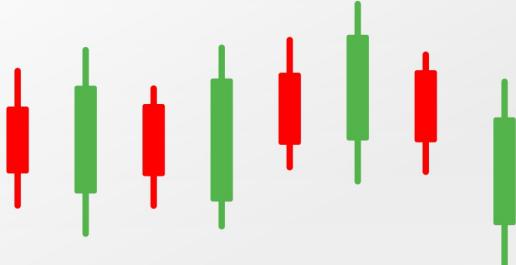

RXT is the only accepted form of currency to purchase licensed customized trading SKINZ through RaptorXchange. Esports equipment such as jerseys, gaming chairs, vinyl marketing wraps and more can also be purchased from our vendors at a discount with RXT

Future RXT

As RaptorXchange develops our decentralized platform, RXT will come to play a large role in transactions as well as order processing. TX Gas will become a secondary function of RXT
